3G Rules - Dürkopp Adler GmbH

Amendment of the Infection Protection Act § 28 from 24.11.2021

In general, this means that only participants, who have been vaccinated, recovered or tested and can provide appropriate proof will be allowed to attend the courses.

We therefore ask you to bring appropriate proof (complete proof of vaccination or convalescence or PCR test/PoC-PCR test no more than 48 hours ago, POC antigen test no more than 24 hours ago) to your courses.

Children are considered as tested until the end of compulsory education.

Additionally, distance or mask applies in all courses.

You may remove your mask in your permanent seat that is at least 5 feet away from others.

In courses where the minimum distance cannot be maintained, you must wear at least a medical mask.

Therefore, all participants are required to bring proof of their current 3G status, in digital or analog form, to each course date, along with their ID card or passport.

The check of the 3G status takes place on each course day, before the start of the course by the gatekeeper at the gate entrance and once before the start of the course by the instructor.

We use the Robert Koch Institute's CovPass check app to verify digital certificates.

The gatekeeper is instructed to match ID card data with certificate data.

By law, persons who cannot meet their verification obligation may not be admitted.
