

Application Center

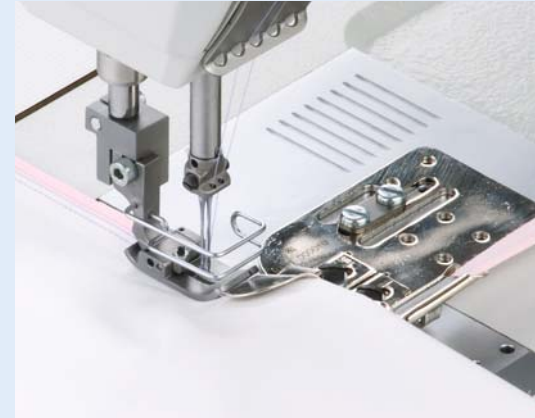

Individual system solutions

With its innovative special sewing machines, sewing automates and sewing units the Dürkopp Adler AG counts among the trendsetters in the field of sewing technology worldwide. The range of services offered also includes customer-specific applications and special solutions which are realized in a specially for this purpose established Application Center.

Sewing bed ticking – with consistently high seam quality

Sewing bed ticking – with consistently high seam quality

**Field of application**

Home textiles

Branch/Customer

Leading European manufacturer of home textiles

Problem

With standard needle feed machines the necessary uniform stitch formation cannot be realized, which often leads to inaccurate seams and seam ruffling.

Solution

In order to achieve a constantly perfect stitch formation the specially designed sewing kinematics of the M-Type needle feed machine has been further developed using the appropriate sewing equipment already available in the existing range of products.

Special advantages

- Displacement-free flat seams – also in particularly thin material
- Consistently high quality of the sewing result
- Safe material feed at high sewing speed
- Already available sewing equipment of class 244 can be further used with minor alterations
- Sewing threads up to 160/3 Nm can be processed without any problems – even at high sewing speed

The consultants of the Dürkopp Adler Application Center will be pleased to inform you about the possibilities to realize your special application and to be at your disposal for individual advice.
