#### 1 Assembling the module

#### Information

All modules are assembled in the same way. Assembly is illustrated by the example of the I/O module.

### NOTICE

#### Property damage may occur!

Possible damage to the control by voltage spikes.

Switch off the machine before connecting the I/O module. NEVER perform hot plugging.

Fig. 1: Assembling the module (1)

12

To assemble the I/O module:

- 1. Slide the plate (2) into the holder (1).
- 2. Use screws (3) to screw in the holder (1) at a suitable place under the tabletop.

Fig. 2: Assembling the module (2)

3. Slip the PCB housing (4) onto the module (5).

Fig. 3: Assembling the module (3)

4. Slide the module (5) into the holder (1).

Fig. 4: Assembling the module (4)

5. Connect the cable with the 37-pin plug (6) to the DAC flex control (7) (port -X200).

## 2 Software settings

## 2.1 Setting up the module

To set up the module:

- 1. Log in as a technician. User: technician Password: 25483
- 2. Open the menu Navigation > Settings > Machine Configuration > Additional

*I/O Configuartion* and press the \_\_\_\_\_<sup>±</sup> Input Configuration button.

✤ The following display appears:

Fig. 5: Setting up the module (1)

- 3. Go to input M1.X100A.2, parameter t 57 00 and select the desired mode ( p. 8).
  - 4. Go to input *M1.X100A.2*, parameter *t* 57 04 and select if the function will be switched stored or not stored.

5. Open the menu 🔅 Machine Configuration >

 $\bigcirc_{=}^{\pm}$  Additional I/O Configuration and press the

- **Output Configuration** button.
- ✤ The following display appears:

#### Fig. 6: Setting up the module (2)

| Settings              |  |
|-----------------------|--|
| Settings Q            | ✓ Machtion > 12% Addition > = % Output Configuration |
| Machine configuration | M1.X100A.9   |
| Program defaults      | □∑ T 59 00 Mode -                                    |
| Liser Configuration   | M1.X100A.10  |
| Manual Data Transfer  |  |
| Service               |  |
| i Information         | M1.X100A.11  |
| Software Update       | □ X T 59 20 Mode -                                   |

6. Select the desired mode in the output you require ( $\square p. \delta$ ).

## 2.2 Input and output modes

| Input modes                               | Output modes             |
|---|--------------------------|
| Threading                                 | Footlifting              |
| Backtack suppression/activation           | Thread Tension           |
| Manual backtack                           | Thread Trimmer           |
| Half stitch                               | Needle cooling           |
| Whole stitch                              | NSB knife                |
| Indicator position                        | NSB block                |
| Needle heigh                              | Pos. 1                   |
| Needle cooling                            | Pos. 2                   |
| Additional thread tension                 | Clean thread monitor     |
| Stitch length switching                   | Suppression backtack LED |
| Seam center guide                         | 2nd stitch length LED    |
| Light barrier                             | 2nd thread tension LED   |
| Operation lock active when contact open   | 2nd foot stroke LED      |
| Stroke quick-adjustment                   | Center guide LED         |
| Switch to next segment                    | Raise/lower center guide |
| 2nd edge guide position (gap)             | Motor running            |
| Foot lighten position                     | 2nd edge guide pos LED   |
| Additional fullness                       | NSB exhaust              |
| Tape tension                              | Puller LED               |
| Puller                                    | Pressure Puller          |
| Operation lock active when contact closed | Raise/lower puller       |
| Operation lock in seam                    | Backtacking in process   |
| Trigger program selection                 | In seam                  |
| Program selection Bit B0                  | Segment Output 01        |

| Input modes                              | Output modes                    |
|--|---------------------------------|
