Parameter list

H868
0791 868960 EN

Table of Contents

1 Parameter

The parameter list helps the user quickly locate and change a parameter.
Some parameters have been grouped into categories which can be found on several levels and reflect their importance and their resulting minor or major effect on the sewing behavior of the machine.

Class parameters H868

Parameter set: EN
For subclasses: H868-x90x6x

1.1 Operator level

E	C	P	Min	Max	Preset value	Unit	Description
Bobbin stitch counter/ remaining thread monitor/piece counter							
o	06	00	0	4	0	-	Bobbin stitch counter / remaining thread monitor 0 = Off; 1 = Bobbin stitch counter A; 2 = Bobbin stitch counter B; 3 = Bobbin stitch counter C; 4 = Remaining thread monitor
o	06	01	1	9999	3000	x o0604	Reset value of bobbin stitch counter A
o	06	02	1	9999	2000	x o0604	Reset value of bobbin stitch counter B
o	06	03	1	9999	1000	x o0604	Reset value of bobbin stitch counter C
o	06	04	1	255	10	x stitches	Factor of bobbin stitch counters A, B and C
o	06	05	0	9999	0	Stitches	Number of stitches for the remaining thread monitor
o	06	06	0	1	1	-	Stop sewing motor when the counter reaches 0 0 = Off; 1 = On
o	06	07	0	1	0	-	Sewing foot stays down after thread cutting 0 = Off; 1 = On
o	06	08	0	1	0	-	When a counter has elapsed, a reset must occur after thread cutting 0 = Off; 1 = On

E	C	P	Min	Max	Preset value	Unit	Description
o	06	10	0	1	0	-	Display of the piece counter 0 = Off; 1 = On
o	06	20	0	1	0	-	Needle thread monitor up 0 = Off; 1 = On
o	06	30	0	1	0	-	Needle thread monitor down 0 = Off; 1 = On
Needle cooling/fan							
o	13	00	0	1	0	-	Needle cooling 0 = Off; 1 = On
Light barrier							
o	16	00	0	255	0	Stitches	Equalizing stitches for normal stitch length
o	16	01	0	255	0	Stitches	Equalizing stitches for long stitch length
o	16	10	1	255	1	Seams	Number of light barrier seams
o	16	20	0	255	0	Stitches	Equalizing stitches for knitted garment filter
Stitch loosening device							
o	25	00	0	2	0	-	Mode of automatic stitch loosening device 0 = Only stitch loosening; 1 = Stitch loosening and 2nd stitch length; 2 = Stitch loosening, 2nd stitch length, and quick stroke adjustment;

1.2 Technician level

E	C	P	Min	Max	Preset value	Unit	Description
Bartack							
t	00	00	300	6000	800	rpm	Start bartack speed
t	00	01	0	254	8	10°	Feed-forward angle when the bartack magnet is switched on (Switching from forward to backward during bartacking)
t	00	02	0	254	10	10°	Forward-feed angle when the bartack magnet is switched off (Switching from backward to forward during bartacking)
t	00	03	0	1	0	-	Start bartack can be interrupted by setting pedal to 0 position 0 = Off; 1 = On
t	00	04	0	2	0	-	Mode for end of start bartack 0 = Sewing continues after end; 1 = Machine stops and must be restarted using the pedal; 2 = Thread cutting after start bartack
t	00	05	0	1	1	-	Pedal release only after additional A path 0 = Off; 1 = On
t	00	06	0	500	0	ms	Delay time to speed release after start bartack
t	00	07	0	255	0	ms	Fall time of bartack magnet
t	00	09	0	1	0	-	Additional forward path at start bartack with the number of backward stitches 0 = Off; 1 = On
t	00	10	300	6000	800	rpm	End bartack speed
t	00	11	0	254	12	10°	Feed-forward angle when the bartack magnet is switched on (Switching from forward to backward during bartacking)
t	00	12	0	254	14	10°	Forward-feed angle when the bartack magnet is switched off (Switching from backward to forward during bartacking)

E	C	P	Min	Max	Preset value	Unit	Description
t	00	13	0	1	0	-	Bartack magnet stays switched on during the last backward path (simple end bartack and multiple end bartack) until position 2 has been reached 0 = Off; 1 = On
t	00	19	0	1	0	-	Additional forward path at end bartack with the number of back-ward stitches 0 = Off; 1 = On
t	00	20	300	6000	2800	rpm	Multiple start bartack speed (only during darning program)
t	00	21	0	254	16	10°	Feed-forward angle when the bartack magnet is switched on (Switching from forward to back-ward during bartacking) (only during darning program)
t	00	22	0	254	22	10°	Forward-feed angle when the bartack magnet is switched off (Switching from backward to forward during bartacking) (only for darning program)
t	00	23	0	3	0	-	Multiple start bartack as darning program 0 = Off; 1 = On
t	00	24	0	1	0	-	Pedal-dependent speed for darning program 0 = Off; 1 = On
t	00	25	0	1	0	-	First path with different number of stitches (C) in multiple start bartack 0 = Off; 1 = On
t	00	26	0	1	0	-	Last path with different number of stitches (B) in multiple end bartack 0 = Off; 1 = On
t	00	30	0	1	0	-	Ornamental-stitch bartack 0 = Off; 1 = On
t	00	31	0	2500	800	rpm	Speed of ornamental-stitch bartack
t	00	32	0	1000	250	ms	Ending time during ornamental-stitch bartack

E	C	P	Min	Max	Preset value	Unit	Description
t	00	35	0	1	1	-	Speed decrease when feed dog is repositioned 0 = Off; 1 = On
t	00	36	0	6000	500	rpm	Level to which the speed is supposed to be reduced when the feed dog is repositioned
t	00	40	0	2	1	-	Type of start bartack when the bartack activation switch is engaged 0 = Simple start bartack; 1 = Double start bartack; 2 = Multiple start bartack
t	00	41	0	2	1	-	Type of end bartack when the bartack activation switch is engaged 0 = Simple end bartack; 1 = Double end bartack; 2 = Multiple end bartack
t	00	44	0	3	3	-	Handling of manual bartack 0 = Manual bartack engages immediately; 1 = Manual bartack engages depending on parameters t 00 45 and t 00 46; 2 = During manual bartacking, the drive stops in the position set under parameters t 00 45 and t 00 46; 3 = During manual bartacking, the drive stops in the position set under parameters t 00 45 and t 00 46 (only if parameter t 00 30 = 1)
t	00	45	0	1	0	-	Switch on the manual bartack 0 = Needle down; 1 = Needle up
t	00	46	0	1	0	-	Switch off the manual bartack 0 = Needle down; 1 = Needle up
t	00	47	0	3	0	-	Speed limit for manual bartack 0 = Off; 1 = Limit to DB3000 if t 00 44 = 0 – 1 2 = Limit to ornamental-stitch bartack speed if t 00 44 = 2 – 3

E	C	P	Min	Max	Preset value	Unit	Description
t	00	50	0	999	100	ms	Activation time of bartack magnet in period t1
t	00	51	5	100	100	%	Duty cycle in period t1
t	00	52	0,0	600,0	0,0	s	Activation time of bartack magnet in period t2 (if 0, the bartack magnet remains continuously switched on)
t	00	53	5	100	100	%	Duty cycle in period t2
t	00	54	0	1	0	-	Increase in U_{mag} when the bartack magnet is activated 0 = No; 1= Yes
t	00	60	0	359	73	°	Angle at which the feed dog repositioner is to supposed switch
t	00	61	0	200	14	ms	Switch on inertia
t	00	62	0	200	16	ms	Switch off inertia
t	00	63	0	1	0	-	Switch feed dog repositioner depending on angle 0 = No; 1= Yes
t	00	70	0	255	0	Stitches	Catch Backtack forward
t	00	71	0	255	0	Stitches	Catch Backtack backward
Thread clamp (TC)							
t	01	00	0	10	6	-	Mode of thread clamp 0 = TC switch-on angle = t 01 01, TC switch-off angle = t 01 02, Without FL; 1 = TC switch-on angle = 108°, TC switch-off angle = 268°, Without FL; 2 = TC switch-on angle = 49°, TC switch-off angle = 110°, Without FL; 3 = TC switch-on angle = 49°, TC switch-off angle = 190°, Without FL; 4 = TC switch-on angle = 108°, TC switch-off angle = 268°, FL switch-on angle = 108°, FL switch-off angle = 154°; 5 = TC switch-on angle = 108°, TC switch-off angle = 268°, FL switch-on angle = 44°, FL switch-off angle = 154°;

E	C	P	Min	Max	Preset value	Unit	Description
							6 = TC switch-on angle = 75°, TC switch-off angle = 215°, FL switch-on angle = 60°, FL switch-off angle = 120°, FL switch-off angle, additionally stroke-dependent; 7 = Without TC, FL switch-on angle = t 01 11, FL switch-off angle = t 01 12, 8 = TC switch-on angle = t 01 01, TC switch-off angle = t 01 02, FL switch-on angle = t 01 11, FL switch-off angle FL = t 01 12; 9 = Without TC, FL switch-on angle = t 01 11, FL switch-off angle = t 01 12, FL switch-off angle, additionally stroke-dependent; 10 = TC switch-on angle = t 01 01, TC switch-off angle = t 01 02, FL switch-on angle = t 01 11, FL switch-off angle = t 01 12, FL switch-off angle, additionally stroke-dependent;
t	01	01	0	359	75	°	Switch-on angle of thread clamp
t	01	02	0	359	215	°	Switch-off angle of thread clamp
t	01	11	0	359	60	°	Switch-on angle of sewing foot lift
t	01	12	0	359	120	°	Switch-off angle of sewing foot lift
t	01	13	0	100	100	%	Duty cycle of sewing foot lift in mode 4-8

E	C	P	Min	Max	Preset value	Unit	Description
t	01	20	0	3	3	-	Thread clamp options 0 = Thread clamp only at seam beginning; 1 = Thread clamp at seam beginning and during reverse; 2 = Thread clamp at seam beginning and during sewing foot lift; 3 = Thread clamp at seam beginning and during reverse and sewing foot lift
t	01	30	0	2	0	-	Neat seam beginning (NSB) 0 = Off; 1 = On when thread clamp is active (old mode); 2 = On when thread clamp is active (new mode)
t	01	31	0	9999	92	° / ms	Switch-on angle of additional thread clamp (o.m.) / Switch-on time knife (n.m.)
t	01	32	0	9999	201	°	Switch-off angle of additional thread clamp
t	01	33	0	9999	105	°	Switch-on angle of thread advancing device
t	01	34	0	9999	203	° / 10 ms	Switch-off angle of thread advancing device (o.m.) / Time duration of suction (n.m.)
t	01	35	0	9999	62	°	Switch-on angle of thread tension lift
t	01	36	0	9999	94	°	Switch-off angle of thread tension lift
t	01	50	0	999	100	ms	Activation time of thread clamp in period t1
t	01	51	5	100	100	%	Duty cycle in period t1
t	01	52	0,1	120,0	60,0	s	Activation time of thread clamp in period t2 (if 0, the thread clamp remains continuously switched on)
t	01	53	5	100	30	%	Duty cycle in period t2
t	01	54	0	1	0	-	Increase in U_{mag} when the thread clamp is activated 0 = No; 1= Yes
Thread cutter (FA)							
t	02	00	50	750	150	rpm	Speed when cutting the thread
t	02	01	0	1	0	-	Pedal position for initiating the cutting process 0 = Position -2; 1 = Position -1

E	C	P	Min	Max	Preset value	Unit	Description
t	02	02	0	1	0	-	Initiate seam end at seam beginning (with single stitch functions activated) 0 = No; 1= Yes
t	02	10	0	359	25	°	Switch-on angle t 08 12 <= t 02 10 < t 02 11
t	02	11	0	359	265	°	Switch-off angle t 02 10 < t 02 11 <= t 08 13
t	02	20	0	255	0	ms	Delay time for repeated switch-on of thread cutting magnet
t	02	21	0	255	0	ms	Delay time for switch-off of thread cutting magnet
t	02	50	0	999	500	ms	Activation time of thread cutter in period t1
t	02	51	5	100	100	%	Duty cycle in period t1
t	02	52	0,1	120,0	10,0	s	Activation time of thread cutter in period t2 (if 0, the thread clamp remains continuously switched on)
t	02	53	5	100	100	%	Duty cycle in period t2
t	02	54	0	1	0	-	Increase in U_{mag} when thread cutter is activated 0 = No; 1= Yes
t	02	55	0	359	250	°	Angle at which duty cycle 2 is activated (0 = deactivated)
Sewing foot lift (FL)							
t	03	00	0	1	1	-	Sewing foot lift 0 = Off; 1 = On
t	03	01	0	1	0	-	No sewing start over push-botton while the sewing foot is lifted 0 = Off; 1 = On
t	03	10	0	9999	255	ms	Startup delay of machine after sewing foot lift is switched off
t	03	11	0	255	40	ms	Activation delay of sewing foot lift during a machine standstill
t	03	12	0,0	9,999	0,200	s	Activation delay of sewing foot lift at seam end
t	03	50	0	999	200	ms	Activation time of sewing foot lift magnet in period t_1
t	03	51	5	100	100	%	Duty cycle in period t_1
t	03	52	0,0	600,0	0,0	s	Activation time of sewing foot lift magnet in period t_2 (if 0, the sewing foot lift magnet remains continuously switched on)

E	C	P	Min	Max	Preset value	Unit	Description
t	03	53	5	100	100	%	Duty cycle in period t_2
t	03	54	0	1	0	-	Increase in U_{mag} when sewing foot lift magnet is activated 0 = No; 1= Yes
t	03	55	0	1	0	-	Activation sound warning before foot is automatically lowered 0 = No; 1 = Yes
Soft start							
t	05	00	120	1000	400	rpm	Soft start speed
t	05	01	1	99	1	Stitches	Number of soft start stitches
Remaining thread monitor/bobbin rotation monitor/skip stitch detector							
t	06	00	0	2	0	-	Activation of the remaining thread monitor 0 = Off; 1 = Right; 2 = Left & right;
t	06	01	0	1	0	-	Remaining thread monitor mode 0 = Dynamic; 1 = Static;
t	06	02	0,0	3,300	0,0	V	Threshold right
t	06	03	0,0	3,300	0,0	V	Intensity right
t	06	04	0,0	3,300	0,0	V	Threshold left
t	06	05	0,0	3,300	0,0	V	Intensity left
t	06	06	0	1	0	-	Confirmation necessary by messages 0 = no; 1 = yes
t	06	10	0	1	0	-	Skip stitch detector (Not if t 06 00 = 2) 0 = Off; 1 = On
t	06	11	0	1	0	-	Bobbin rotation monitor (Not if t 06 00 = 2) 0 = Off; 1 = On
t	06	12	0	255	0	Stitches	Number of stitches at which the bobbin rotation monitor is activated
Needle thread monitor up							
t	06	20	0	1000	180	rpm	Speed at which the monitor is activated
t	06	21	0	255	2	Stitches	Number of stitches at which the monitor is activated

E	C	P	Min	Max	Preset value	Unit	Description
t	06	22	0	1000	3	ms	Debouncing
Needle thread monitor down							
t	06	30	0	1000	180	rpm	Speed at which the monitor is activated
t	06	31	0	255	2	Stitches	Number of stitches at which the monitor is activated
t	06	32	0	1000	3	ms	Debouncing
Seam paths							
t	07	00	0	2	0	-	Handling of position -2 for seam paths 0 = Cancellation of the seam. The next seam path is sewn; the last seam of the program is canceled with thread cutting; 1 = Termination of the seam with thread cutting (even if not active). The next seam procedure is a free seam; 2 = Termination of the seam with thread cutting (even if not active). Seam program is canceled
t	07	01	0	1	0	-	Automatic mode 0 = Off; 1 = On
t	07	02	0	1	0	-	Signal on switch of path 0 = Off; 1 = On
t	07	03	0	1	0	-	Repair mode 0 = Off; 1 = On
t	07	04	0	1	0	-	Mode for cycling the sewing program 0 = Off; 1 = On
t	07	05	0	1	0	-	Possibility to start sewing from the edited segment 0 = Off; 1 = On
Motor							
t	08	00	500	9999	1600	rpm	Maximum speed
t	08	01	10	400	150	rpm	Minimum speed
t	08	02	10	1000	120	rpm	Positioning speed
t	08	03	1	100	15	rpm/ms	Acceleration ramp
t	08	04	1	100	10	rpm/ms	Deceleration ramp

E	C	P	Min	Max	Preset value	Unit	Description
t	08	05	0	1	0	-	Direction of rotation of motor 0 = Left; 1 = Right
t	08	06	0	2	1	-	Motor brake during normal stop 0 = Braking for period of t 08 09; 1 = Brake continuously active when stopped; 2 = Position is continuously maintained
t	08	07	0,1	6,0	3,0	A	No-damage current when machine down
t	08	08	0	255	20	-	Response time to changes in position
t	08	09	0	999	200	ms	Duration of motor brake
t	08	10	-	-	-	-	Reference position
t	08	11	-	-	-	-	Needle positions
t	08	12	0	359	12	°	Needle in the low position (bottom dead center) (position 1)
t	08	13	0	359	330	°	Thread lever at top dead center (position 2)
t	08	14	0	359	340	°	Point position
t	08	15	0	359	245	°	Threading position (needle thread)
t	08	16	0	1	0	-	Drive to bearing position via pedal
t	08	19	1	9999	387	-	Transmission ratio = (motor diameter / machine diameter) * 1000
t	08	20	-	-	-	-	Calibrate pedal
t	08	21	1	64	24	Levels	Number of speed levels of pedal
t	08	22	0	7	3	-	Speed curve
t	08	23	1	255	90	ms	Debouncing of position -1
t	08	24	1	255	15	ms	Debouncing of position -2
t	08	25	0	1	0	-	Selection of pedal 0 = Analog; 1 = Digital
t	08	26	0	1	0	-	Inverting signals of the digital pedal 0 = No; 1 = Yes (Efka pedal with adapter)

E	C	P	Min	Max	Preset value	Unit	Description
t	08	27	0	2	0	-	Handling of position -1 (only with digital pedal) 0 = Not stored; 1 = Stored; 2 = Stored after Thread Trim, not stored after sewstart
t	08	28	40	70	60	-	Factor of position -1 This parameter can be used to adjust the response between -1 and 0
t	08	29	20	70	49	-	Factor of position -2 This parameter can be used to adjust the response between -2 and 0
t	08	30	0	1	0	-	Display of speed 0 = Off; 1 = On
t	08	31	0	1	0	-	Display of current position 0 = Off; 1 = On
t	08	32	0	1	0	-	After power-on and a tap on the pedal, the needle is moved to the "Needle up" position 0 = No; 1= Yes
t	08	33	0	6	0	-	Output of position signals (signal must be assigned to an output, e.g. t 51 50) 0 = No signals are output; 1 = Pos. 1; 2 = Pos. 2; 3 = Pos. 1 & Pos. 2; 4 = Motor operation signal; 5 = Motor operation signal & Pos. 1; 6 = Motor operation signal & Pos. 2
t	08	34	0	255	0	°	Angle for the length of the Pos. 1 signal
t	08	35	0	255	0	°	Angle for the length of the Pos. 2 signal
t	08	36	10	9999	10	rpm	Speed at which the motor operation signal is activated
t	08	40	150	9999	1200	rpm	Speed limit DB3000
t	08	41	150	9999	1200	rpm	Speed limit DB2000
t	08	44	1	255	40	ms	Debouncing of position 0

E	C	P	Min	Max	Preset value	Unit	Description
t	08	50	10	500	180	rpm	Preset speed value for single stitch functions (half or full stitch, etc.)
t	08	51	1	6000	180	rpm	Speed for manual sewing per push button
t	08	52	0	1	0	-	Sewing functions via push button also in manual mode 0 = No; 1= Yes
t	08	60	0	64	0	Level	Shifting of position 1 Number of speed levels is reduced
Thread tension							
t	09	00	0	3	2	°	Mode of thread tension and thread tension reduction when sewing foot lift is active 0 = no thread tension lift; 1 = Thread tension lift in the seam; 2 = Thread tension lift after thread cutting; 3 = Thread tension lift in the seam and after thread cutting
t	09	01	0	1	1	°	Thread tension with threader (needle thread) lifted 0 = No; 1= Yes
t	09	02	0,0	2,55	0,0	s	Activation delay of thread tension lift after thread cutting when sewing foot is lifted (only active if t 09 00 = 2 or 3)
t	09	03	0	2	0	°	Coupling of additional thread tension with quick stroke adjustment 0 = no coupling; 1 = Additional thread tension during quick stroke adjustment; 2 = Additional thread tension when quick stroke adjustment speed is reached
t	09	10	0	359	255	°	Switch-on angle t 08 12 <= t 09 10 < t 09 11 during cutting process
t	09	11	0	359	325	°	Switch-off angle t 09 10 < t 09 11 <= t 08 13 during cutting process
t	09	20	0	255	0	ms	Delay time for repeated switch-on of thread tension magnet during cutting process
t	09	21	0	255	50	ms	Delay time for switch-off of thread tension magnet

E	C	P	Min	Max	Preset value	Unit	Description
t	09	30	0	1	0	-	Open additional thread tension during start bartacking 0 = No; 1 = Yes;
t	09	31	0	1	0	-	Open additional thread tension during end bartacking 0 = No; 1 = Yes;
t	09	32	0	1	0	-	Open additional thread tension during manual bartacking 0 = No; 1 = Yes;
t	09	33	0	1	0	-	Open additional thread tension for thread clamp 0 = No; 1 = Yes;
t	09	34	0	1	0	-	Open additional thread tension during soft start 0 = No; 1 = Yes;
t	09	35	0	1	0	-	Open additional thread tension during stitch shortening 0 = No; 1 = Yes;
t	09	36	0	1	0	-	Open additional thread tension during quick stroke adjustment 0 = No; 1 = Yes;
t	09	37	0	1	0	-	Open additional thread tension during single stitch functions 0 = No; 1 = Yes;
t	09	50	0	999	100	ms	Activation time of thread tension magnet in period t_1
t	09	51	5	100	100	%	Duty cycle in period t_1
t	09	52	0,0	600,0	0,0	s	Activation time of thread tension magnet in period t_2. (if 0, the thread tension magnet remains continuously switched on)
t	09	53	5	100	100	%	Duty cycle in period t_2
t	09	54	0	1	0	-	Increase in U_{mag} when the thread tension magnet is activated 0 = No; 1= Yes
Stroke adjustment							
t	10	00	0	1	1	-	Stroke adjustment 0 = No; 1= Yes

E	C	P	Min	Max	Preset value	Unit	Description
t	10	01	0	9999	1200	rpm	Stroke adjustment speed
t	10	02	1	21	9	Level	Lower threshold
t	10	03	1	21	18	Level	Upper threshold

2 Error, warning and information messages

Code	Type	Possible cause	Remedial action
1000	Error	Sewing motor encoder plug (Sub-D, 9-pin) not connected	- Connect encoder cable to the control, use correct connection
1001	Error	Sewing motor error: Sewing motor plug (AMP) not connected	- Check connection and plug in, if necessary - Test sewing motor phases (R= 2.8 Ω, high impedance to PE) - Replace the encoder - Replace the sewing motor - Replace the control
1002	Error	Sewing motor insulation error	- Check motor phase and PE for low-impedance connection - Replace the encoder - Replace the sewing motor
1004	Error	Sewing motor error: Incorrect sewing motor direction of rotation	- Replace the encoder - Check plug assignment and change, if necessary - Check wiring in machine distributor and change it, if necessary - Test motor phases and check for correct value
1005	Error	Motor blocked	- Eliminate stiff movement in the machine - Replace the encoder - Replace the motor
1006	Error	Maximum speed exceeded	- Replace the encoder - Perform reset - Check class (t 51 04)
1007	Error	Error in the reference run	- Replace the encoder - Eliminate stiff movement in the machine
1008	Error	Encoder error	- Replace the encoder
1010	Error	External synchronizer plug (Sub-D, 9-pin) not connected	Connect cable of external synchronizer to control, use correct connection (Sync) - Only required for machines with transmission!
1011	Error	Encoder Z pulse missing	- Switch off the control. Turn handwheel and switch on the control again - If error is not corrected, check encoder
1012	Error	Synchronizer fault	- Replace the synchronizer

Code	Type	Possible cause	Remedial action
1052	Error	Sewing motor overcurrent, internal current increase >25 A	- Check selection of class - Replace the control - Replace the sewing motor - Replace the encoder
1053	Error	Sewing motor overvoltage	- Check selection of class - Replace the control
1054	Error	Internal short circuit	- Replace the control
1055	Error	Sewing motor overload	- Eliminate stiff movement in the machine - Replace the encoder - Replace the sewing motor
1203	Information	Position not reached (during thread cutting, reversal, etc.)	- Check and, if necessary, change controller settings. Mechanical changes to the machine. (e. g. thread cutting setting, belt tension, etc.) - Check position (thread lever at top dead center)
2020	Information	DACextension box not responding	- Check connection cables - Check LEDs of DACextension box - Software update
2021	Information	Sewing motor encoder plug (Sub-D, 9-pin) not connected to DACextension box	- Connect encoder cable to DACextension box using the correct connection
2101	Information	DA stepper card 1 reference run timeout	- Check reference sensor
2103	Information	DA stepper card 1 step losses	- Check for stiff movement
2106	Information	DA stepper card 1 speed overrun	-
2120	Information	DA stepper card 1 not responding	- Check connection cables - Check LEDs of DACextension box - Software update
2121	Information	DA stepper card 1 encoder plug (Sub-D, 9-pin) not connected	- Connect encoder cable to the control, use correct connection
2122	Information	DA stepper card 1 flywheel position not found	- Check connection cables - Check stepper motor 1 for stiff movement
2155	Information	DA stepper card 1 overload	- Check for stiff movement
2201	Information	DA stepper card 2 reference run timeout	- Check reference sensor
2203	Information	DA stepper card 2 step losses	- Check for stiff movement

Code	Type	Possible cause	Remedial action
2206	Information	DA stepper card 2 speed overrun	-
2220	Information	DA stepper card 2 not responding	- Check connection cables - Check LEDs of DACextension box - Software update
2221	Information	DA stepper card 2 encoder plug (Sub-D, 9-pin) not connected	- Connect encoder cable to the control, use correct connection
2222	Information	DA stepper card 2 flywheel position not found	- Check connection cables - Check stepper motor 2 for stiff movement
2255	Error	DA stepper card 2 overload	- Check for stiff movement
3100	Error	AC-RDY timeout, intermediate circuit voltage did not reach the defined threshold in the specified time	- Check the mains voltage - If the mains voltage is OK, replace the control
3101	Error	High voltage fault, mains voltage, longer duration >290 V	- Check mains voltage, if nominal voltage is continuously exceeded, stabilize it or use a generator
3102	Error	Low voltage failure (2nd threshold) (mains voltage < 150 V AC)	- Check the mains voltage - Stabilize mains voltage - Use generator
3103	Information	Low voltage warning (1st threshold) (mains voltage < 180 V AC)	- Check the mains voltage - Stabilize mains voltage - Use generator
3104	Warning	Pedal is not in position 0	When switching the control on, take your foot off the pedal
3105	Error	U24 V short circuit	- Disconnect 37-pin plug; if error persists, replace control - Test inputs/outputs for 24 V short circuit
3106	Error	U24 V (I^2T) overload	- One or more magnets defective
3107	Error	Pedal not connected	- Connect analog pedal
3108	Information	Speed limited due to insufficient mains voltage	- Check the mains voltage
3109	Warning	Operation lock	- Check tilt sensor on machine
3150	Information	Maintenance necessary	- For information on lubricating the machine, see the service instructions for the machine

Code	Type	Possible cause	Remedial action
3151	Warning	Maintenance necessary (operation cannot continue unless parameter t 51 14 is reset, see the operating instructions of the machine)	- Service is urgently required, see service instructions for the machine
3155	Information	No release for sewing process	- Parameter t 51 20 – t 51 33 = 25 - Input signal for sewing process release required
3160	Information	Stitch loosening device	- Stitch loosening cannot be performed
3170	Information	Quality issues of the fabric thickness signal	- Check the positioning of the fabric thickness sensor
3210	Information	Topthread torn	-
3211	Information	Bottomthread torn	-
3215	Information	Bobbin stitch counter (info value 0 reached)	- Change bobbin, set counter value - press counter reset button
3216	Information	Remaining thread monitor left	- Change left bobbin
3217	Information	Remaining thread monitor right	- Change right bobbin
3218	Information	Remaining thread monitor left and right	- Change left and right bobbin
3219	Information	Mode for Bobbing-Thread-Winding is active	- Thread cutting
3223	Information	Skip stitch detected	-
3224	Information	Bobbin failed to rotate	-
3325	Information	SSD sensor is dirty	-
6353	Error	Internal EEprom communication error	- Switch off the control, wait until the LEDs are off and then switch on again
6354	Error	External EEprom communication error	- Switch off the control, wait until the LEDs are off, check connection for machine ID, switch on control again
6357	Error	Short circuit EEprom	- Switch off the control, wait until the LEDs are off, check connection for machine ID, switch on control again - replace control - replace Masch-ID
6360	Information	No valid data on external EEprom (internal data structures are not compatible with the external data storage device)	- Software update
6361	Information	No external EEprom connected	- Connect machine ID

Code	Type	Possible cause	Remedial action
6362	Information	No valid data on internal EEprom (internal data structures are not compatible with the external data storage device)	- Check machine ID connection - Switch off the control, wait until the LEDs are off and then switch on again - Software update
6363	Information	No valid data on internal and external EEprom (Software version is not compatible with the internal data storage device, emergency operating features only)	- Check machine ID connection - Switch off the control, wait until the LEDs are off and then switch on again - Software update
6364	Information	No valid data on internal EEprom and external EEprom not connected (the internal data structures are not compatible with the external data storage device, emergency operating features only)	- Check machine ID connection - Switch off the control, wait until the LEDs are off and then switch on again - Software update
6365	Information	Internal EEprom defective	- Replace the control
6366	Information	Internal EEprom defective and external data not valid (emergency operating features only)	- Replace the control
7202	Information	DACextension box boot error	- Check connection cables - Software update - Replace DACextension box
7203	Information	Checksum error during update	- Check connection cables - Software update - Replace DACextension box
7212	Information	DA stepper card 1 boot error	- Check connection cables - Software update - Replace DACextension box
7213	Information	Checksum error occurred while updating DA stepper card 2	- Check connection cables - Software update - Replace DACextension box
7222	Information	DA stepper card 2 boot error	- Check connection cables - Software update - Replace DACextension box
7223	Information	Checksum error occurred while updating DA stepper card 2	- Check connection cables - Software update - Replace DACextension box
7231	Information	Bobbin control is not connected	- Check connection cables - Software update

Code	Type	Possible cause	Remedial action
7232	Information	Bootloader failure bobbin control	- Check connection cables - Software update
7233	Information	Checksum error occurred while updating bobbin control card	- Check connection cables - Software update
7241	Information	Fabric thickness sensor is not connected	- Check connection cables - Software update
